

Kon Boot USB Installation Guide:

1. Insert your USB thumb drive into your computer.
2. Run KonBootinstall.exe and select your thumb drive from the list, click enter. If multiple USB drives appear, be sure to select the drive which corresponds to the proper thumb drive inserted.

This can be verified by browsing My Computer in Windows.

**This installation will erase certain information on the thumb drive. Data can be potentially lost!
Be sure to backup before copying if needed.**
