## Window Management

If not all monitors use the same resolution, windows may have to be resized when being moved.

Resize mode: ☒ proportional ☐ to fit

☒ take taskbars into account when maximizing to the desktop

☒ enable moving of maximized windows using the mouse

## Desktop Icons

☒ preserve position of desktop icons

Ignored Monitors

Unused monitors can be ignored, and will then no longer be visible in the user interface.

If you are using multiple hardware profiles, different custom settings are saved for each profile.

1. Écran Plug-and-Play on NVIDIA GeForce 7600 GS

☐ ignore this monitor

By default only disabled monitors will be ignored. If you want to ignore a monitor but it isn't possible to disable it, check the option below.

☐ ignore enabled monitors

OK
